

The Argentine No Till Farmers Association (Aapresid) in collaboration with AGRIB Excellency Limited have organized an agricultural study trip entitled; **“Promoting Agribusiness Excellency through an Exposure Trip to Argentina”**

Course Summary

This course will provide you with a practical and thorough exposure in innovative and productive agricultural practices. The participants will get a chance to attend the Annual Mega Agribusiness Expo (EXPOAGRO) where the latest innovations in technologies are demonstrated and information about the sustainable production systems used by the Argentine farmers will be availed.

Through this course, the challenges in agricultural production financing are examined coupled with solutions that have been applied successfully in Argentina. Meeting with the Association of Cooperatives in Argentina will give you a great exposure to cooperative management.

Dairy farming integrated to agriculture and the mixed system with a focus on areas of agricultural aptitude and other livestock will be discussed. The role of contract farming and certification in agriculture will be explored to enhance agricultural systems in your country. Finally the best combination of cultural, biological and chemical measures to manage diseases, insects, weeds and other pests.
